PERFECT FIT INSULATION SOLUTIONS

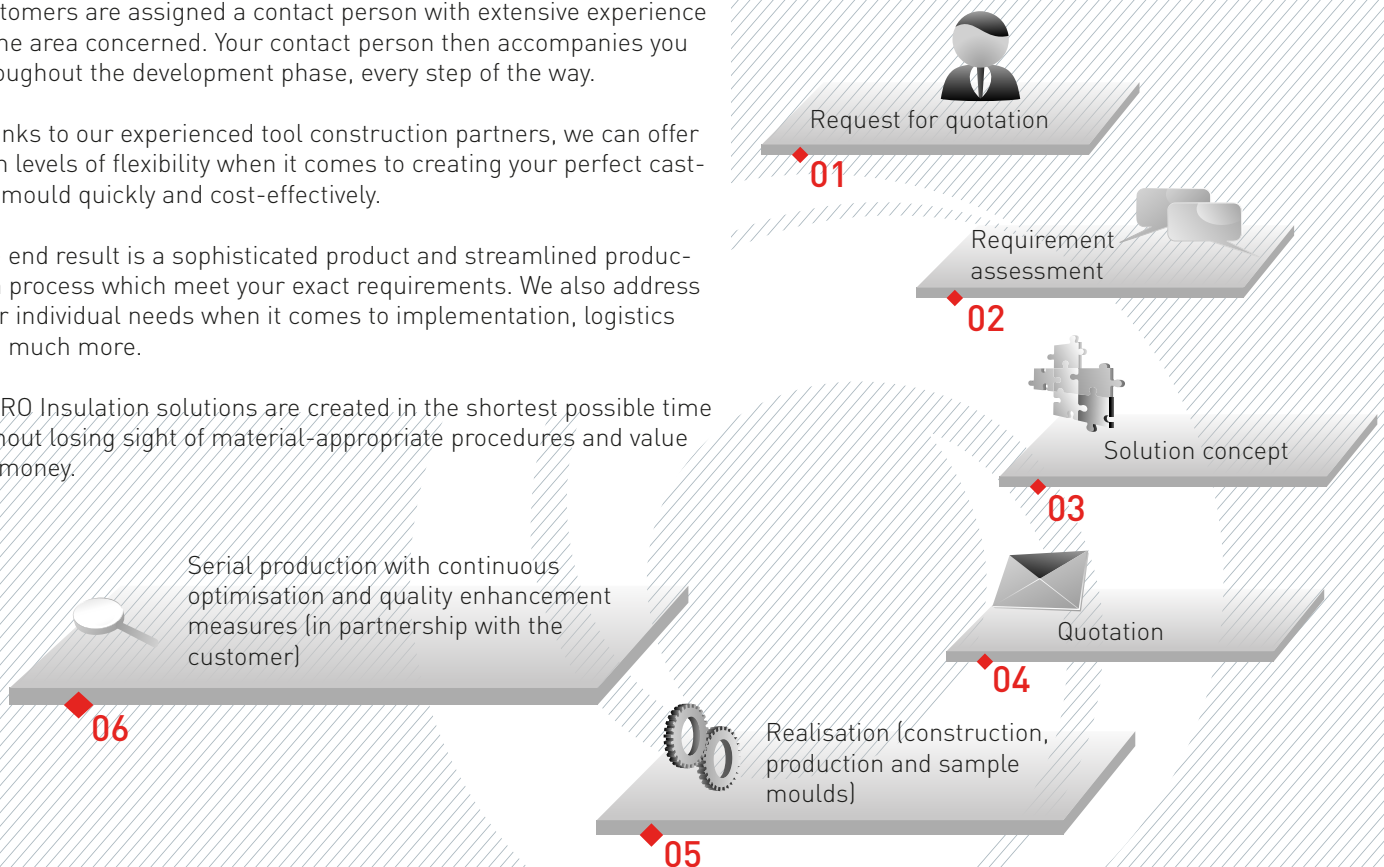

GIPRO is your cast resin specialist for complex development requirements and your reliable partner when it comes to delivering insulation solutions in a timely, professional and cost-effective manner.

We believe that the key to producing superior silicone or epoxy cast resin insulators for our customers is to understand their aims from the word "go". Even during the analysis phase, we examine your technical requirements in detail and work together with you to create the most cost-effective solution for your requirements. All customers are assigned a contact person with extensive experience in the area concerned. Your contact person then accompanies you throughout the development phase, every step of the way.

Thanks to our experienced tool construction partners, we can offer high levels of flexibility when it comes to creating your perfect casting mould quickly and cost-effectively.

The end result is a sophisticated product and streamlined production process which meet your exact requirements. We also address your individual needs when it comes to implementation, logistics and much more.

GIPRO Insulation solutions are created in the shortest possible time without losing sight of material-appropriate procedures and value for money.

FOCUS ON QUALITY FROM DEVELOPMENT TO DELIVERY

GIPRO has high standards when it comes to product quality and service provision. From stage one of product development, GIPRO leaves nothing to chance.

DEVELOPMENT

GIPRO is with you from the very first step when it comes to developing your product. We help you to select the appropriate resin, ensure optimum tool engineering and arrange the production process in accordance with your quantity requirements.

In addition to this, we are always guided by the latest technological developments. GIPRO has many partners in the world of scientific and technological research, in both the public and private sectors.

PRODUCTION

We have the right equipment for all individual requirements, ranging from standard APG machines with a clamping area of 1200 x 1200 mm to a variety of moulding machines of our own design. Vacuum moulding appliances and an open-channel moulding facility are also available.

Modern epoxy resin preparation facilities and certified raw materials guarantee consistently high quality source materials.

QUALITY

At GIPRO we can guarantee faultless delivery, test documentation and product durability. So that you only receive products which meet our exacting quality standards, we use a wide range of state-of-the-art testing equipment:

Electrical testing, X-ray testing, high-precision dimensional testing, helium leakage detection plus a climatic testing chamber for temperature tests and DSC analysis (e.g. to determine glass transition temperatures).

GIPRO - INSULATION PRODUCTS

RAILWAY APPLICATIONS

The support insulators used in railway technology must be able to withstand considerable mechanical strain, as well as a wide range of environmental conditions and temperature fluctuations. GIPRO produces insulation products for mainline locomotives as well as for trams and metros. Our customers include the biggest names in pantograph manufacturing, as well as a considerable number of train operating companies.

HIGH VOLTAGE

GIPRO is an established specialist in secondary bushings for a variety of transformer and transducer equipment. In addition to this, GIPRO also has broad experience in customer-specific insulation parts which meet all quality, durability and efficiency requirements for bushings used in high-stress, high voltage applications.

CABLE ACCESSORIES

The global demand for cable accessories is continually growing thanks to the increasing number of underground power cables. GIPRO is an experienced manufacturer of cable end bushings in all sizes. Innovative production techniques mean we can offer superior quality products at competitive prices.

MEDIUM VOLTAGE

When it comes to medium voltage, we specialise in customer-specific insulation solutions for circuit breakers, fuse housing, delimiters, earth switches, gas-insulated and oil-insulated switchgears, capacitors and transformers. GIPRO offers a range of supports, fuse tubes and bushings for outdoor circuit breakers.

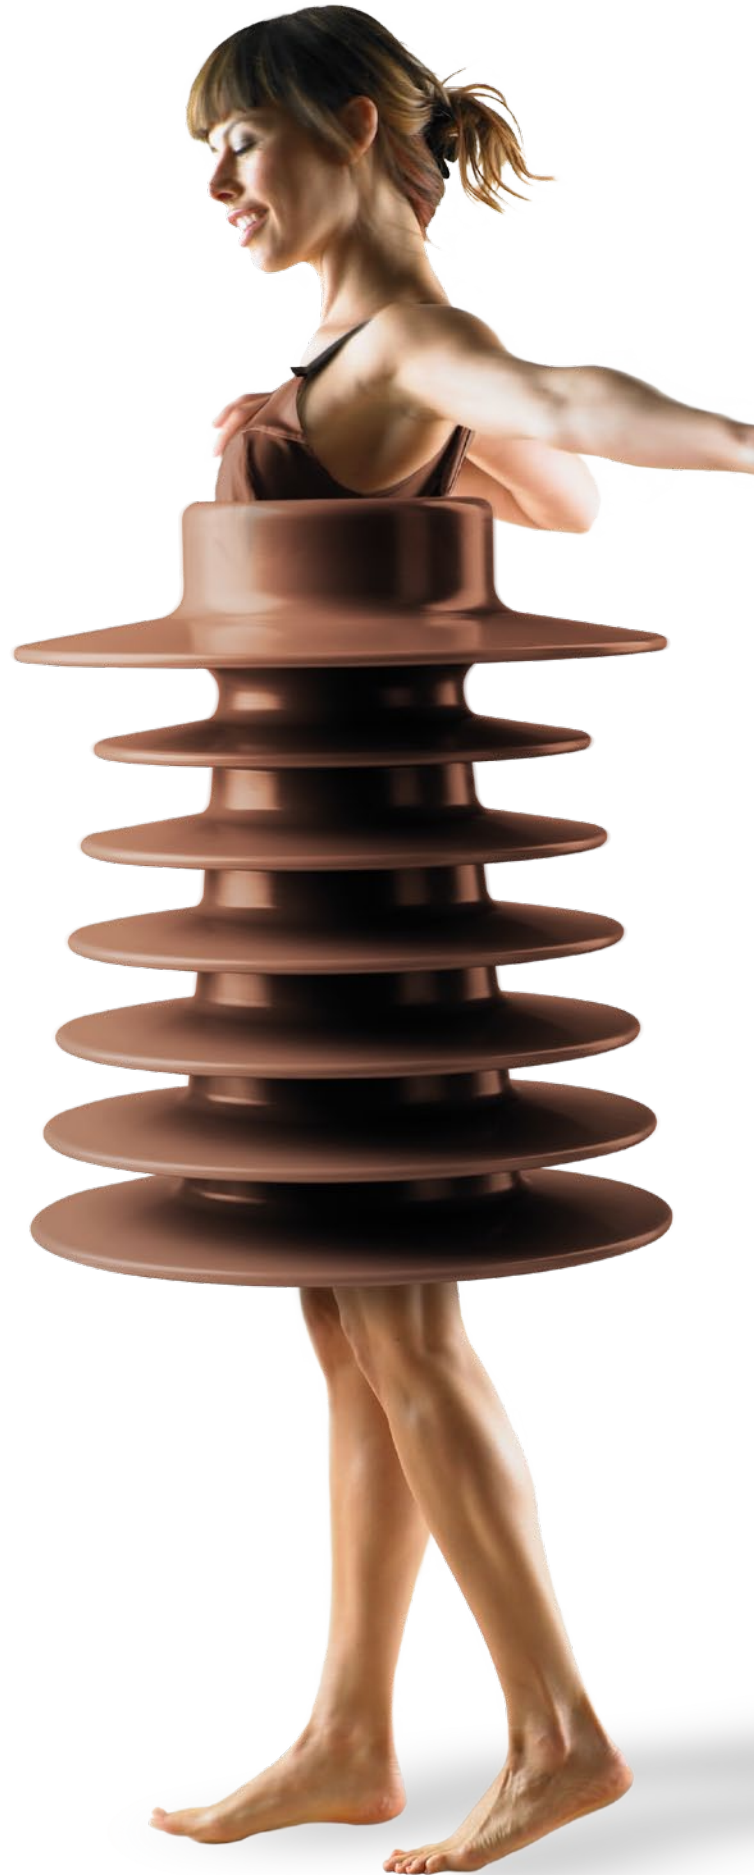

OUR SOLUTIONS ARE THE PERFECT FIT

GIPRO – Where extra effort
comes as standard

The customer-specific epoxy and silicone insulation products manufactured by GIPRO are in high demand and have a wide range of applications within electrical facilities (indoor and outdoor substations, transducers, transformers etc.) as well as railway technology.

What our customers value most are years of reliable product quality, punctual and problem-free order processing and our expert ability when it comes to construction solutions using epoxy and silicone insulation parts. Our customers also value working closely with our customer advisors at a technical level and our consistently rapid response times. GIPRO is on the Preferred Supplier List of all its major company clients.

We offer our employees job security and excellent working conditions in a company environment which is dominated by appreciation, respect and expertise.

The GIPRO production process follows a continuous quality control flow, with all stages certified in accordance with ISO 9001, ISO 14001 and OHSAS 18001.

Outstanding performance earned GIPRO 3rd place at the "Austria's Leading Company" award ceremony.
